

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country trip in their RV. Freshly retired, after spending numerous years working with his brother to assemble their crane business into an industry leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

Whilst on their journey, John spent time talking to previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered an infinite marketplace for a product that could quickly and securely lift people in the air to accomplish upkeep and other construction services.

After returning from their holiday, John set up a joint venture with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design elements of that original lift into current versions.

JLG forklifts have come a long way from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into various marketplaces worldwide and develops new products to ensure customers are capable of being more effective and perform in the workplace within a safer atmosphere.
