The forklift product line remarkably includes 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle designs vary from 3,000 to 33,000 lbs. All vehicles are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift and lift truck company in the North American marketplace, due to its excellent level of product performance and their persistently high level of customer support and service given to all Doosan Infracore Lift Truck clients. The U.S. lift Truck division situated in Cleveland has a professional team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

In the beginning the domestic lift truck marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled lift trucks as part of a home-based machinery expansion venture. Product sales of these products were initially targeted to state-run firms, large scale corporations, and the armed forces. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical education became the new focus for enhancing quality and product development.

Daewoo began the first home-based lift truck business in 1967, and rapidly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a situation of substantial expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to counter act competitive pressures in the US materials handling market. This endeavor greatly expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a contemporary plant which helped launch the business for the fabrication of high added-value products suitable for export. In 1993, the corporation had a global sales system and started exporting designs they had developed through in-house technology, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas markets.
