

Aerial Work Platforms

Aerial Work Platforms - There are different lift truck attachments existing on the market. They could help transform your lift truck so that you could expand your ability to pick objects up or finish clean up jobs and material handling with out difficulty.

Some attachments were specifically utilized for the forks themselves. For example, fork extensions could be used if you require more fork length, which increases lifting capacity. Fork extensions come in lengths varying from forty eight to one hundred twenty inches. Rounded or triangular attachments are another variety utilized when moving rolled material to be able to ensure it does not roll off of the standard flat blades.

Examples of lifting attachments include pivoting and telescoping crane or boom attachments. They can come in several various kinds and are usually used for moving lumber, poles, metal bars and various sort of bulky items. Additional accessories like different kinds of hooks and hook plates are available to be able to pick up things utilizing a sling or chain. Magnetic lifters and slab lifters are other items that could be used along with hook accessories. Slab lifters are specialized attachments that are utilized for carrying various materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which connect to your forklift to make moving rolls of carpet a lot easier. The accessory connects onto the lift truck's forks and has a pole that goes through the center of the carpet roll.

There are numerous various types of forklift accessories that can be used for facility maintenance like for example snow forks. These blades attach to front end loaders and can move materials like for example soil, snow and dirt. Other common cleanup attachments include magnetic sweepers and standard sweepers. Standard sweepers consist of a broom that the forklift blades connect onto for sweeping large spaces like for example warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to sixty inches and this surface area makes clean up simple and fast.

Material spreaders are other attachments used on forklifts. These spreaders are helpful for a range of applications like spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Another optional lifting accessory are work platforms. These can be utilized by several various companies day after day. Platforms may differ in size from 36" x 36" to up to 60" x 60". Several units may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise employees up to an overhead location using the forklift. Larger platform models have additional space for workers in order to carry tools and other necessary objects meant for the job. Often work platforms are constructed of poly material or steel.
